New look for Microvideo is more than skin deep

Microvideo have launched their new 1U and 3U rack frames. Designed by a leading industrial designer, the new look was for more reasons than pure aesthetics.

Microvideo have always had a great name for product reliability, but with broadcasters expecting more features from the same (or less!) real estate, HD requiring increased power, and operators needing to have more intuitive control over their equipment, the opportunity was taken to overhaul our entire system and give:

- Improved thermal management which gives longer life and higher reliability.
- Greater power handling to accommodate Microvideo's new HD range.
- Improved user control to simplify set-up and management.
